Look at your last Winter's Overcoat and see if the cloth about the seams in the back and around the cuffs is not badly worn. If you tuck your sleeves you will make them too short. If you lengthen them or leave them as they are, you cannot get away from having people know that you cannot afford a new overcoat. Then is there any reason why you should not buy a new one, especially when you can do so at these prices: \$10 Overcoat for \$6.95 \$10 Cravenette Raincoats \$6.95 \$12 Grey Overcoat latest style \$7.95 Our Men's Overcoats are stylish, being especially made for us by and the little men: to be sure we have a splendid line of overcoats for little men. \$4 Overcoat for \$2.95

The Curse of Cathartics

It has long been known by the well informed that pills, oils, salts, calomel and other violent cathartics caused irritation of the delicate mucous membrane lining of the Stomach and Bowels, caused the Bowels to become calloused, deranged the Stomach, and that in many cases the irritation or derangement extended also to the Kidneys and Liver, yet owing to the temporary need of a laxative, many people, knowing this to be true, have resorted to these harsh, harmful purgatives. If you are among the number you can vouch for the truth of our statement that each dose taken left your Bowels and system generally in worse shape than before; that a larger dose must be taken from time to time, that the point is finally reached when you find it necessary to change to some other of these vile remedies, with which you repeat your experience with the first, and so on until you have gone the rounds.

Evenly Heated Homes

The all-tight feature embodied in Cole's Original Air-Tight Wood Heater makes it possible to control the burning of wood, first to charcoal. Charcoal makes a clean, hot fire and leaves very little ash. This means a saving of at least 50 per cent in the saving of fuel as compared to stoves with cast-iron or side door frames which have leaky cast iron and steel joints. It is a perfect radiator of heat, giving out all the heat produced by the fire. The heat from burning a single newspaper can be felt across the room. It has a fire over sight with light wood, coals or trash. The fire is never out and by simply putting in a little fresh fuel in the morning, you can heat up the room from zero to 70 degrees in five minutes' time. We have them in all sizes and styles. Price \$12.00 and up. (8-24)
